

Issue: Email software issue

An issue has been reported with the email software, affecting user communication.

Steps to Resolve:

- 1 Step 1: Step 1 - Verify the incident details and confirm the issue with the user.
- 2 Step 2: Step 2 - Check the email server status and ensure it is operational.
- 3 Step 3: Step 3 - Review the logs for any errors related to email processing.
- 4 Step 4: Step 4 - Identify if the issue is affecting multiple users or just one.
- 5 Step 5: Step 5 - Check the configuration settings of the email software.
- 6 Step 6: Step 6 - Test the email functionality from a different user account.
- 7 Step 7: Step 7 - Restart the email service to see if the issue resolves.
- 8 Step 8: Step 8 - If the issue persists, escalate to the software vendor for support.
- 9 Step 9: Step 9 - Document all findings and actions taken in the incident record.
- 10 Step 10: Step 10 - Communicate the resolution steps to the affected user and close the incident.
