

Issue: Logi Application Functionality Issue

An issue has been identified with the Logi application, as noted in the work logs. The incident was initially logged with a generic short description (matching its sys_id) and an empty description field. Further investigation is required to pinpoint the exact nature of the problem and its impact on users, as the incident is currently in a 'New' state.

Steps to Resolve:

- Verify incident details and confirm affected services.
- Check server/network logs for errors.
- Review recent changes or deployments.
- Attempt to reproduce in test environment.
- Check hardware and connectivity.
- Run diagnostics (ping, traceroute, netstat).
- Validate firewall and routing policies.
- Apply safe temporary mitigation.
- Update stakeholders and plan next steps.
- Perform root cause analysis and prevention plan.
